

Legislative News

Legislative Roundup

A thank you to the Legislative Team in Washington, D.C. and our own Executive team for preparing and distributing the Washington Connection. They do a great job of keeping us all up to date on Federal issues as well as reaching out to us for input and advocacy.

Here in Nevada, there is a fair bit of interim action. Much of which is led by our partners at the Nevada State Medical Association. Here are some items to watch as we move toward the next legislative session in 2019.

Various interim committees are visiting the topic of out of network billing and fair payment. This is a recurring issue at the legislature and we are engaged in the conversations looking for a solution.

There continues to be a lot of activity around the new opioid law and education. Proposals are being gathered to streamline the requirements during the next legislative session. Also, education is in abundance throughout the state.

As always, please let us know your concerns as we move into the busy legislative season in Nevada.
