

Board Member Spotlight

Secretary: Mario R. Moya, ATC/L, MBA

My background reflects over 25 years of diversified experience encompassing both health care and business development expertise. Currently tasked with, and have accomplished effectively managing three Orthopedic companies with over 20 providers and 100 employees. As a business man, it's been my job to increase revenues, manage and reduce costs, and develop new innovative ideas for increasing revenue opportunities. My personal motto is: "If I can help enough people get what they want, I will get what I want." I enjoy listening to people's goals, and by getting to know what makes my employees excited, I believe I can obtain their highest levels of productivity and overall performance.

Throughout my career I've demonstrated effective communication and presentation skills providing "hands-on" management to spearhead several strategic programs resulting in successfully increasing company's overall operational profitability. I have staffed, worked with and led large organizations of employees and volunteers ranging from physicians and nurses to front desk support. In addition, my language skills speaking both English and Spanish throughout my career have demonstrated a keen ability to work with people from all lifestyles.

When I am not working, I am spending as much time as possible with my wife and four boys. We enjoy our active lifestyles, whether it's hiking, running marathons, or competing in local CrossFit competitions. Active lifestyles have taught us to be disciplined and focused while working on our weaknesses, and is engaging and empowering to the community. Lastly, I am a mentor, and have recently started mentoring UNLV Master Health Care Administrative students, and I am looking forward to mentoring others to enhance their knowledge and business success.
